

ATIB SADIK SHAIKH

Mumbai, Maharashtra, India (Open to Relocation) | +91 7666817461 | atibshaikh121@gmail.com | [linkedin.com/in/atibshaikh](https://www.linkedin.com/in/atibshaikh) | <https://atib121.github.io/AtibShaikh.github.io/>

PROFESSIONAL SUMMARY

Commerce graduate with 1+ year of professional experience in MIS reporting and data management, maintaining 99.5%+ accuracy across 5,000+ daily records. Skilled in SQL, Power BI, and Advanced Excel, with four end-to-end analytics projects covering sales, marketing, e-commerce, and inventory data. Comfortable writing SQL queries (joins, CTEs, window functions), building Power BI dashboards, and translating data into clear business recommendations. Seeking a Junior Data Analyst role; open to relocation.

TECHNICAL SKILLS

- SQL: Joins, CTEs, Window Functions, CASE WHEN, DENSE_RANK(), Subqueries, Correlated Subqueries, Schema Design (DDL/DML)
- Power BI: DAX, Power Query, Data Modeling, Interactive Dashboards
- Advanced Excel: Pivot Tables, VLOOKUP, INDEX-MATCH, Data Validation, Conditional Formatting
- Reporting: MIS Reports, KPI Tracking, Business Recommendations, Stakeholder Communication
- Other Tools: Google Sheets, MS Word, MS PowerPoint

WORK EXPERIENCE

Data Entry Operator (MIS & Reporting) — Dodhia Industries Limited *Jul 2025 – Aug 2026*

- Prepared daily production, MIS, and breakdown reports in Excel and Google Sheets for management review.
- Maintained 99.5% data accuracy across 5,000+ records daily through validation rules and systematic checks.
- Built automated Excel templates with formulas and validation, reducing report preparation time by approximately 30%.
- Coordinated with production, sales, and accounts teams to resolve data discrepancies within deadlines.
- Identified and corrected a large-scale data entry error before it affected downstream reporting; implemented a validation rule to prevent recurrence.

DATA ANALYTICS PROJECTS

V Mall Sales Analytics Dashboard — *SQL, Power BI, DAX*

- Analyzed 40 million (INR) in annual sales data using SQL window functions to diagnose profit leaks by category.
- Identified a high-revenue, low-margin category driven by excessive discounting; recommended a discount cap projected to recover 3.2 million (INR) annually.
- Built an interactive Power BI dashboard for management review.
- GitHub: github.com/Atib121/V-Mall-Sales-Analysis

Warehouse Inventory Optimization — *SQL, Business Analysis*

- Analyzed inventory data across 4 warehouses using SQL CTEs and DENSE_RANK() to flag dead stock and reorder risk.
- Proposed a safety stock reduction strategy projected to free up working capital.
- GitHub: github.com/Atib121/Warehouse-Inventory-optimization---SQL-analysis

E-Commerce SQL Analysis: Customer Retention & Revenue Analytics — *MySQL*

- Designed a 4-table relational schema (customers, products, orders, order_items) for an e-commerce platform.
- Built retention, churn, CLV, and Average Order Value metrics using CTEs, window functions, and optimized subqueries.
- GitHub: github.com/Atib121/E-Commerce-SQL-Portfolio-Advanced-Customer-Retention-Revenue-Analytics

Ad Campaign Audit & Budget Allocation Dashboard — *Power BI, DAX, Power Query*

- Analyzed marketing spend and performance across channels, account tiers, and devices using Power BI and DAX.
- Modeled a budget reallocation from an underperforming channel to the strongest-performing channel, projecting increased monthly profit with no additional spend.
- GitHub: github.com/Atib121/Ad-Campaign-Audit

EDUCATION

Bachelor of Commerce (B.Com) — University of Mumbai, 2024

HSC (Commerce) — MBBI Junior College, Talasari, 2021
